

WPPA 2018 WISCONSIN LAW ENFORCEMENT SURVEY

The **Wisconsin Professional Police Association** (WPPA) continues to lead the nation in proactively seeking out the opinions of those residents and communities they serve. WPPA remains the only law enforcement organization nationally that produces an annual survey and shares it publicly. This is the **6th annual poll** conducted by **St. Norbert College's Strategic Research Institute** from February 26 - March 28, 2018 of 400 residents (250 landline; 150 cell phone) by Random Digit Dial.

The WPPA prides itself in asking the tough questions facing law enforcement today, and for using the invaluable insights provided by the people it serves to advance a public dialogue on the future of policing in Wisconsin.

OPPOSE

METHODOLOGY

TELEPHONE SURVEY

- ▶ Telephone interviewing dates were from February 26th, 2018 to March 28, 2018.
- ▶ 400 members of the general public completed the telephone survey:
 - ▶ 250 landline interviews.
 - ▶ 150 cell phone interviews
- ▶ Sampling strategy was a Random Digit Dial (RDD) sample for landline with random selection of respondent at the household level; random selection of cell phone numbers.
- ▶ The survey represents a scientific random sample of individuals who live in Wisconsin.

The data was weighted to more accurately reflect the demographic make-up of the area under study. Survey weights are derived from 2016 population estimates (most recent data available).

All questions were cross tabulated with the various demographic groups; only statistically significant differences at the .05 level are reported. A difference between groups at the .05 level means that we can be 95% sure that the correlation between two values did not occur by chance only.
