

## Early Literacy Coaches by District/School

### Introduction

In alignment with state statute, literacy coaches are assigned at the school level using a process grounded in both equity and need. Placements are distributed evenly between schools with the greatest identified literacy needs and schools that requested a coach. In addition, at least two coaches are placed in private schools and one coach is placed in a charter school. This structure ensures statewide coverage while balancing support for schools with the greatest needs and those ready to engage in coaching partnerships.

Below are the school districts, schools and private schools selected by full-time equivalent.
